PREFACE

For this first volume of American Folk-Dances I have taken the "contra-dances" of rural New England, for this is one of the old, most truly American sections of our country, where many generations of the same stock have grown up undisturbed by foreign influences, and where sufficient time has elapsed since the days of the early settlers for the building up of certain traditions and customs.

The social group-dances which have originated or evolved through common usage under such conditions in this country are as truly folk-dances as those found in the older countries, and have elements which are almost universally characteristic of folk-dances. And yet it has often been said that our country has no folk-music or folk-dancing of its own other than that of the American Indian! We are to-day a nation of immigrants, not of Indians, and the folk-traditions that are most essentially our own are those which have developed (from traditions brought to us by our early immigrants) into something peculiarly our own. And we have the new and dazzling wealth of folk-art brought in with the comparatively recent rush of immigration from many countries, the beauty and value of which is not yet generally understood or appreciated. Surely, the folk-dances and music of all the nationalities which make up the people of our country may be considered ours just as these people are our people, and every effort should be made to encourage, preserve and assimilate this dancing and music, so that we may not only have these added resources for social enjoyment and recreation, but that our national life may be enriched with beauty and color and joy of living which may become the foundation of a yet undreamed-of development of art in this country.

It was with the hope of assisting toward this end that my earlier collections of folk-dances and music of other countries were published, and for the same purpose the Organization Committee of an American Folk-Dance Society was formed in February, 1916.¹

This present volume contains some of the old Country-Dances which are most essentially *American* Folk-Dances because they have grown here. Some of them are slightly reminiscent of English country-dances, and were probably originally suggested by or evolved from them. Most of them, however, seem to be products of this country, and all have a typical and distinctly individual quality of their own, both in their form and the manner and style in which they are danced.² The constant repetition of the theme, and the easy swing and rhythm of the dance, are almost hypnotically fascinating.

¹On account of the war the work of this organization has been postponed.

²A study of the form and pattern of these folk-dances shows (as in all folk-dances) the close analogy between the folk-dance and the folk-songs.

PREFACE—*Continued*

These old dances also have a really delightful social element, in that each couple progresses to a new place in the set and dances with a new couple at each repetition of the figure.

Many of the dances included in this collection are in common use at the present time in New England, at country dances, where I have had the pleasure of dancing them; a number of them are rarely danced now and have practically disappeared. They were resurrected for me, from memory, by old fiddlers and others who used to attend the old-time "kitchen dances" forty years or so ago. Still others are from some of the numerous old "call books" of that time, which were used by the fiddlers who played and "called" for the dances. In these only the "calls" for the figures were given and no description of how the figures were done. Fortunately, the same calls are used for certain figures to-day, so that with a knowledge of these it has been possible to interpret and describe some of the dances which are now obsolete.

Some of the most widely used of the contra-dances to-day in New England are The Circle, Lady of the Lake, Boston Fancy, Portland Fancy, Hull's Victory, Soldier's Joy, and Old Zip Coon (or, the Morning Star); while among the half-forgotten or less used ones are Chorus Jig, Green Mountain Volunteers, and Fisher's Hornpipe.

Some of the dances which are not from New England are the Virginia Reel, "Dan Tucker," and "John Brown." The Virginia Reel has been considered by many as the most representative American folk-dance, whereas it is nothing more nor less than the well-known popular English country-dance known as "Sir Roger de Coverly," and can hardly be classed among the more typically American country-dances which have either evolved or originated here. "Sir Roger" was apparently brought by the English to Virginia, where it became popular as a society dance. It has remained practically unchanged, and, as the "Virginia Reel," has become widely known, probably more as a society dance than a country-dance. Dan Tucker is an old favorite in the Middle West, and John Brown (which is so similar to Dan Tucker that it probably is a variation of it) was found in Connecticut.

It will be noticed that many of the tunes to which these dances are done are popular old Irish, English and Scotch jigs, reels and hornpipes (which by long familiarity have become our own), or obvious variations of them, while others are apparently of native origin.

It is a misfortune that such dances and tunes as these should fall into disuse, and that summer visitors to the country should place their stamp upon the dancing and music there, instead of taking advantage of the opportunity to enjoy the country dances and to bring them back to the city, where this kind of dancing could be a source of social enjoyment. The introduction of modern dancing into the

PREFACE—*Continued*

country inevitably forces out the old fiddlers (who cannot play the new dance-music, though they play the old dance-music irresistibly), and the older people, who can dance only the contra-dances. The forcing out of such music and such dancing is a real loss to the life of the rural community, as well as to the cause of folk-dancing. Fortunately, however, enough of these dances still remain to make it possible to revive them, and perhaps to bring them into more general use. I have prepared this collection in the hope that it may be of assistance in spreading a more general knowledge of some of our most typically American dances, so that many others may share the delight which I have found in them.

For my knowledge of these dances I am indebted to friends too numerous to mention in different parts of New England, and in particular to Mr. Kimball ("Uncle Steve"), who has played the violin for country dances for over forty years, Mr. and Mrs. Cyrus Durgin, Mr. and Mrs. N. M. Holden, Mr. and Mrs. Harry McKeen, Mr. Joe Farnham, and many other friends.

THE DANCES

MUSIC.

The most characteristic music for these dances is that to which they have been done in their original setting in the past—namely, the music of a single violin, played as only the real contra-dance fiddler can play it! Nowadays, however, the violin and piano (or violin and organ) are most usual at country dances, and the old-time fiddlers who play alone and “call” for the dancing are scarce. These jigs, reels and hornpipes are essentially violin music, and no other instrument can do them full justice. Since, however, violin music will probably not be available for general use, the music in this volume has been arranged for the piano.

CALLS.

The dances are most successful when “called.” It has been the custom for the violinist to “call” the figures as he plays, and this is quite a difficult art. The calls are expressions or phrases which stand for certain definite figures, and in this way the dancers are prompted, so that in a large set all the dancers begin the various figures simultaneously and the dance proceeds in an orderly and regular manner. Some of the typical old calls are: “Balance and Swing,” “Down the Centre and Back,” “Cast Off,” “Ladies’ Chain,” “Right and Left,” “Four Hands Around,” “Forward and Back,” etc.

The way to time the calls is as follows:

1. After playing a strain of the music through, rather rapidly, to give notice of the next dance, call: “Please form for Chorus Jig” (or whatever the dance is to be). If the dancers do not form promptly, repeat the strain.
2. When the set is formed and ready to begin, call: “Down the Outside and Back” (or whatever the first call is), and *immediately after* giving this call, begin playing. In this way the dancers have preliminary notice of what the figure is to be, and begin dancing on the first note of the music.
3. Each succeeding call is given during the two measures immediately preceding the strain on which the next figure is to be started. It is given just before the dancers finish the preceding figure.

To bring the dance to a close, call: “Forward and Swing Partners,” and during the last two measures of first strain, while they are swinging, call: “Promenade around the Hall” (or “Promenade to Seats”), and play the second strain to the finish.

FORMATIONS.

There are three formations characteristic of contra-dances: (1) Around the room in couples; (2) Quadrille set; and (3) Longways set. The following diagrams illustrating these, and all diagrams throughout the book, the following symbols are used to represent the women and men:

○ = Woman □ = Man

(3) Longways Formation

There are two kinds of longways formations:

(a) Ordinary formation

The dancers form in two parallel lines, the women on the left as seen from the front, and the men on the right. This is the formation of the majority of the dances. (Cf. Old Zip Coon, Chorus Jig, Fisher's Hornpipe, Arkansas Traveler, etc., Diagram 3.)

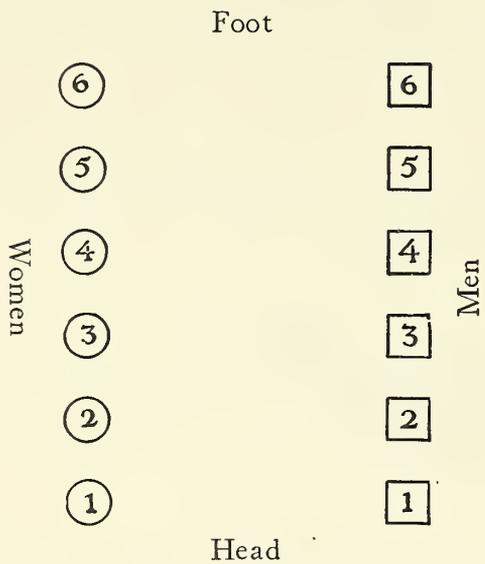

Diagram 3

(b) "First, third and every other couple cross over"

The dancers first take the ordinary formation; then, at the call "First, third and every other couple cross over," the man and woman of each odd couple (1st, 3rd, 5th, 7th, etc.), exchange places (Diagram 4). From this new formation the dance is begun. (Cf. Lady of the Lake, Boston Fancy, Green Mountain Volunteers, Speed the Plough, etc.)

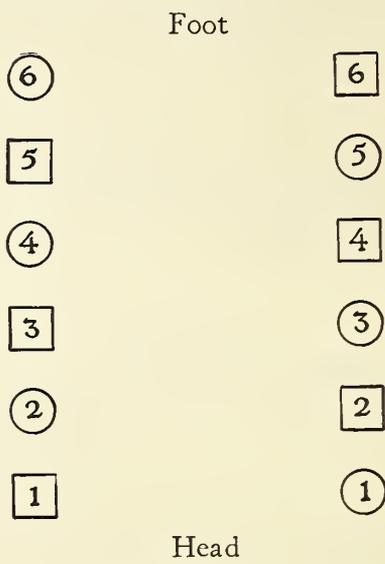

Diagram 4

LONGWAYS DANCES

Number of couples in a set

All longways dances require at least six couples in a set. Three of the dances in this collection are intended for six couples only; these are the Virginia Reel, the Devil's Dream and Chase the Squirrel. All the others may be danced by a large number of couples, the length of the set being limited only by the length of the room. When large numbers are dancing, however, it is better to divide them into two sets, so that the progression may be continued until all have made the complete round of the set, without making the dance too long.

Characteristics

With but six exceptions, all the dances in this collection are in longways formation, and have the following elements in common:

- (1) A routine of figures, which constitute the dance, and which is repeated continuously until the dance is brought to a close.
- (2) A general form or pattern in which these figures are arranged, which has two parts:
 - (a) A first, or characteristic, part, consisting of figures peculiar to the particular dance.
 - (b) A second, or common, part, which is almost identical in all these dances, consisting of several figures, one of which is the "casting off," which effects a shift of the dancers to new positions in the set, and gives the dance its progressive character.

This progressive element is peculiarly characteristic of contra-dances, and gives them their delightful social element, since each couple progresses to a new position in the set at each repetition of the dance, and dances with a different couple each time.

Progression

Some of the longways dances have figures which involve *two couples*, while others involve *three couples*, but in both cases the progression is accomplished in the same manner, that is, all these sub-groups of two (or three) couples throughout the set dance simultaneously, and at the "cast off" the head couple of each of these sub-groups move down one place lower in the set, so that at the next repetition of the dance they dance with the new couple or couples who are now next below them. In the dances where the figures involve two couples, it is the odd couples (1st, 3rd, 5th, etc.) who take the initiative, cast off, and progress down the set one place lower each time. These I have termed the "active" couples, while the other couples (2nd, 4th, 6th, etc.) are called the "neutral" couples. In the dances where three couples are involved, the 1st,

4th, 7th couples, etc., are the *active* ones, and the 2nd and 3rd, 5th and 6th, 8th and 9th, etc., are the *neutral* couples.

In every longways dance, all the couples in the set begin dancing at the same time and continue with the "active" couples "casting off" and progressing down the set one place lower each time, so that the "neutral" couples are gradually moved up toward the head of the set. When a neutral couple reach the head of the set, they stand idle during one repetition of the dance, and then become "active," as already described.

In the "Lady of the Lake," and other dances where the "*First, third and every other couple cross over*" before beginning the dance, a neutral couple, on reaching the head of the set, exchange places and stand idle during one repetition of the dance; then become "active." When an active couple reach the foot of the set, they exchange places and become "neutral."

The "Cast off"

"Casting off" is the evolution by which the active couple accomplishes its progression to the next lower place in the set. It is invariably preceded by "Down the Centre and Back," in which the active couples go down the centre of the set and return up the centre to a point almost in line with the places they have just been occupying in the set. Here they release hands, separate, passing through the gaps in their lines which represent their places at the beginning of the figure, go around behind the next couple, and take up a new position next below that couple. (Diagram 5.)

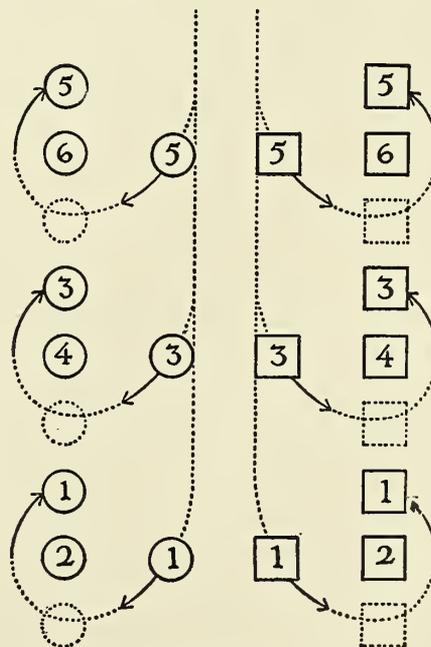

Diagram 5

THE STEPS

The Usual Country-Dance Step

The invariable step used throughout these dances (unless otherwise specified) is an easy, natural, springy walking step. This is executed, especially by the men, with a certain slight emphasis and complacency of manner, which almost suggest a swagger. There is a slight raising of the elbows at each step, and a slight scuffling of the feet. Two of these steps are taken to a measure.

Buzz Step

This is a sort of pivoting step, used when swinging partners in place. The man holds his partner in ordinary dance position, but well out to his right, so that they are practically side by side, with right shoulder to right shoulder. (Diagram 6).

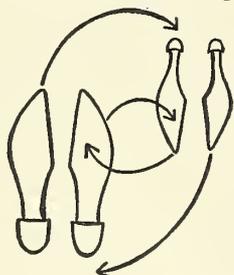

Diagram 6

In fitting the step to the music, each measure should be counted ("one, and, two, and"). On "one," put down the right foot in place; on "and," step forward on the ball of the left foot; on "two," put down the right foot on the same spot as before; on "and," step forward on the ball of the left foot, and so on. The step is usually continued for eight measures, and is merely a quick walk (or run) with the right foot always put down in the same place and the left foot always advancing. More weight is put on the right foot than on the left, which gives a slight emphasis on "one" and "two." With this step the man swings his partner around very vigorously.

Chassé Step

In fitting this step to the music, each measure should be counted: "one, and, two, and."

(Meas. 1.) On "one," slide the foot forward; on "and," close the left foot to the right foot. On "two," slide the right foot forward again; on "and," pause.

(Meas. 2.) Repeat the same with the left foot. This is merely the familiar "two-step."

Galop Step

In fitting this step to the music, each measure should be counted, "one, and, two, and."

On "one," slide the right foot sideward to the right; on "and," close the other foot to it; on "two," slide the same foot again to the side as before; on "and," close the other to it, and so on, continuing in the same direction. (To galop to the left, execute the same step to the left with the left foot.)

Balance Step

The following are five different ways in which the balance step is done:

(A) (Meas. 1-2.) Take two walking steps forward and two backward.

(B) (Meas. 1.) Step forward on the right foot (one); then swing the left slightly forward and at the same time raise and lower the right heel (two).

(Meas. 2.) Step forward on the left foot; then swing the right foot forward.

(C) Same as B, but continuing forward during the second measure.

(D) (Meas. 1.) Step to the right with the right foot (one), and close the left foot to the right (two).

(Meas. 2.) Repeat the same to the left.

(E) Same as D, but taking it forward and back, instead of to right and left.

THE FIGURES

Balance and Swing (or, "Swing Partners")

The most usual way of executing the "Balance and Swing" to-day, is for partners to meet, take "ordinary dance position" (the usual way of holding partner for waltzing), and swing around vigorously with the buzz step or the usual country-dance step, both man and woman beginning with the right foot. Originally the "Balance" was executed before the swing, but for some reason this has been almost universally abandoned, so that the expression "Balance and Swing" now means nothing more than "Swing Partners." (See Balance Step, under STEPS.)

Down the Centre and Back

In ordinary position (or sometimes with crossed hands joined) a couple go eight steps down the centre of the set toward the foot; then swing half around (or, when crossed hands are joined, they face about without releasing hands and without swinging around) so as to face up the set, and return eight steps toward the head of the set (8 measures).

Down the Outside and Back

The man and woman go eight steps down the

outside of their respective lines, then face about and, retracing their steps, return to their places (*8 measures*).

Down the Outside and up the Centre

The man and woman go down the outside of their respective lines as in the preceding figure. They meet at the foot of the set, where they join hands and return up the centre of the set (*8 measures*).

Woman down the Outside and Man down the Centre

The woman goes down the outside of her line and returns, as in the preceding figure, while at the same time her partner goes down the centre of the set and returns up the centre (*8 measures*).

Woman down the Centre and Man down the Outside

The reverse of the preceding figure.

All Hands Around

All dancers join hands in a ring (with hands slightly raised), and circle 16 steps to the left, in the direction of the hands of the clock (*8 measures*).

Eight Hands Around

Eight dancers join hands in a ring, and circle to the left, as in the preceding figure (*8 measures*).

Four Hands Around

Four dancers circle as in the preceding figure.

Half Around

The dancers join hands in a ring as in the three preceding figures, and circle to the left, but go only halfway around, with 8 steps (*4 measures*).

Ladies' Chain

This is danced by two couples facing each other, with the women on the right of their partners. The two women advance toward each other and join right hands; passing each other, they release right hands and join left hands with the opposite men. Without releasing her left hand, each man puts his right arm around the woman's waist and swings her half around, so that they face the dancers on the opposite side. All this is done in eight steps (*4 measures*). During the next four measures the same is repeated, so that the women return to their own partners, who swing them around in the same manner, so that all finish in their original positions (*8 measures*).

There is a variation in the manner of executing this figure in several of the dances, but this is described where it occurs.

Promenade

To promenade is merely to march around the set in couples, in the direction opposite to the hands of the clock. (Diagram 7.)

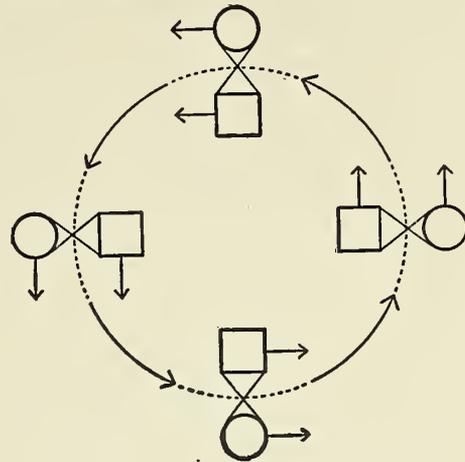

Diagram 7

It is most usual for partners to join crossed hands and promenade either with the usual country-dance step or with the chassé step. Sometimes, however, they dance around the set with galop step, in ordinary dance position.

Half Promenade

In a half promenade, the couples go only halfway around a circle. This figure occurs only in the "Boston Fancy," where each separate couple execute it with the opposite couple, so that the two lines finish in exchanged positions. (Diagram 8.)

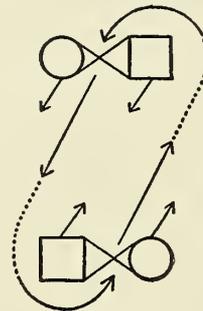

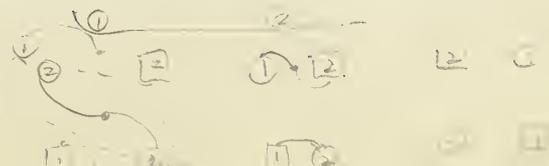

Diagram 8

Promenade Around the Hall (or, Promenade to Seats)

When this call is given, each man offers his right arm to his partner, and escorts her to a seat.

Right and Left

This is executed either by two opposite couples (as in The Circle), or by two women with two opposite men (as in Hull's Victory, Old Zip Coon, etc.). It consists of two dancers' exchanging places with the two opposite dancers in the following manner:

The two couples advance toward each other, and "pass through," the one on the right in each couple going between the opposite two. (Diagram 9.)

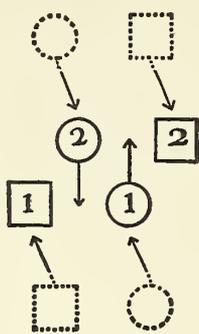

Diagram 9

Then, keeping side by side as if their inside hands were joined, each couple continue to the opposite side, wheeling half around (to do this, the one on the left makes a left-about-face and walks backward, keeping the right shoulder toward the other's left shoulder), thus finishing on the opposite side with the right one still on the right, and the left one still on the left. (Diagram 10.) All this is done in eight steps (4 measures).

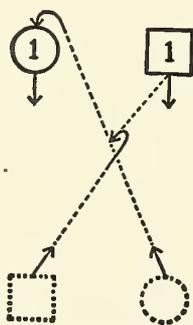

Diagram 10

They then return in the same manner to their original position (4 measures).

Half Right and Left

This is the same as Right and Left, except that only the first half of the figure is done; that is, they

cross over as described, but instead of returning again, they remain where they are (8 steps, 4 measures).

Right-Hand Mill

Four dancers join right hands (as indicated in Diagram 11), and move around in the direction of the hands of the clock.

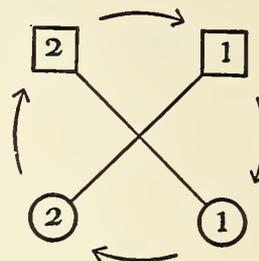

Diagram 11

Left-Hand Mill

This is the reverse of the preceding figure.

Grand Right and Left (or, "Grand Chain").

This is done in a quadrille set. Partners face each other, and join right hands; then, passing each other, each gives the left hand to the next dancer; then the right hand to the next, and so on until all return to original places. (Diagram 12.)

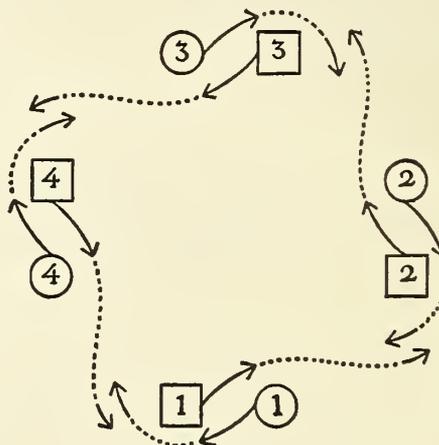

Diagram 12

THE CIRCLE

(Uncle Steve)

1

The first system of music consists of two staves. The upper staff is in treble clef with a key signature of two sharps (F# and C#) and a 6/8 time signature. It contains a melodic line with eighth and sixteenth notes. The lower staff is in bass clef with the same key signature and time signature, featuring a bass line with chords and single notes. The system is divided into four measures, with the numbers 1, 2, 3, and 4 placed above the bass staff in each measure respectively.

The second system of music continues the piece with two staves. The upper staff has a melodic line with eighth and sixteenth notes. The lower staff has a bass line with chords and single notes. The system is divided into four measures, with the numbers 5, 6, 7, and 8 placed above the bass staff in each measure respectively.

2

The third system of music consists of two staves. The upper staff has a melodic line with eighth and sixteenth notes, including accents (>) over some notes. The lower staff has a bass line with chords and single notes. The system is divided into four measures, with the numbers 9, 10, 11, and 12 placed above the bass staff in each measure respectively.

The fourth system of music consists of two staves. The upper staff has a melodic line with eighth and sixteenth notes, including accents (>) and a triplet of eighth notes in the third measure. The lower staff has a bass line with chords and single notes. The system is divided into four measures.

The fifth system of music consists of two staves. The upper staff has a melodic line with eighth and sixteenth notes, including accents (>) and a slur over the final two notes. The lower staff has a bass line with chords and single notes. The system is divided into four measures.

THE CIRCLE (I)

Allegro moderato (♩. = 112)

Musical notation for measures 1-5. The piece is in 6/8 time with a key signature of one sharp (F#). The right hand features a melodic line with eighth and sixteenth notes, while the left hand provides a bass accompaniment of chords and single notes. Measure numbers 1 through 5 are indicated above the bass staff.

Musical notation for measures 6-10. Measures 6-8 are followed by a repeat sign. Measure numbers 6 through 10 are indicated above the bass staff.

Musical notation for measures 11-16. The right hand continues with a melodic line, and the left hand provides accompaniment. Measure numbers 11 through 16 are indicated above the bass staff.

THE CIRCLE (II)

(Mrs. Monroe's Jig)

Allegro moderato (♩. = 112)

Musical notation for measures 1-5. The right hand features a melodic line with eighth notes and triplets. The left hand provides a bass accompaniment. Measure numbers 1 through 5 are indicated above the bass staff.

Musical notation for measures 6-10. The right hand continues with a melodic line, and the left hand provides accompaniment. Measure numbers 6 through 10 are indicated above the bass staff.

Musical notation for measures 11-16. The right hand continues with a melodic line, and the left hand provides accompaniment. Measure numbers 11 through 16 are indicated above the bass staff.

THE CIRCLE

This dance is in some localities known as "Circassian Circle," and in others as "Sicilian Circle." There are also slight variations in the order of the figures. The Circle is usually danced immediately after the "Grand March," or "March," with which it is customary to open a dance.

Formation: At the close of the grand march, the dancers are in a column of couples all around the room. At the call "Form for Circle" the odd couples (first, third, fifth, etc.) turn around so as to face the couple behind, with whom they begin the dance. (Diagram 1.)

Steps: The usual country-dance step and buzz step.

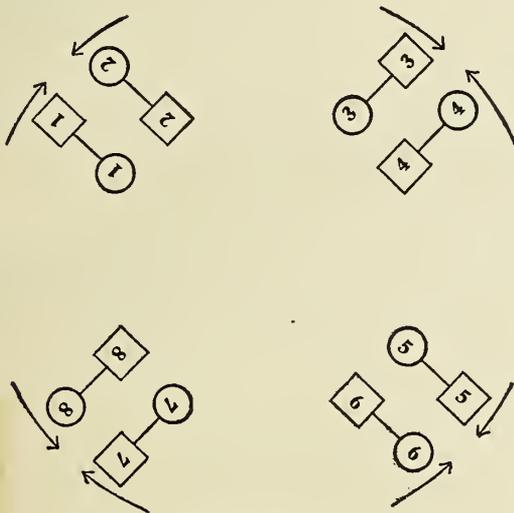

Diagram 1

The Dance.

"Four Hands Around"

(Meas. 1-4.) Each couple join hands in a circle with the opposite couple, and dance around to the left with 16 walking steps, finishing in original places.

"Right and Left"

(Meas. 9-16.) ⁵⁻⁸ Each couple execute "right and left" with opposite couple.

"Swing Partner" (16)

(Meas. 5-8.) Partners take ordinary dancing position, and swing with 8 walking or buzz steps.

"Ladies' Chain"

(Meas. 1-8.) ⁹⁻¹⁶ Each couple execute "ladies' chain" with opposite couple.

"Forward and Back"

(Meas. 9-12.) Each couple join crossed hands and "forward and back" with opposite couple.

"Forward and Pass On"

(Meas. 13-16.) Each couple advance and, without releasing hands, go past the opposite couple (keeping to the left) and "pass on" so as to meet the next couple.

The dance is repeated in the same manner each time, with the odd couples progressing around the room in the direction of the hands of the clock, and the even couples progressing in the opposite direction. When the dance has been continued as long as desired—usually until all have made the round of the circle—they finish with "Swing Partners," and "Promenade around the Hall."

Another common version of the dance is as follows:

(Meas. 1-8.) Right and Left.

(Meas. 9-16.) Swing Partner.

(Meas. 1-8.) Ladies' Chain.

(Meas. 9-12.) Forward and Back.

(Meas. 13-16.) Forward and Pass Through.

THE HAYMAKERS (I)

Allegro moderato (♩ = 112)

(“Magnolia Reel”)

"Swing with Both Hands"

(Meas. 9-12.) The head woman and foot man swing once around with both hands joined, and return to places.

(Meas. 13-16.) The head man and foot woman do the same.

* It has become a common practice to form in one long set for the Virginia Reel, and when there are many dancers, this causes a large proportion of them to stand idle much of the time. It is doubtless on this account that the dance has lost a great deal of its former popularity. When danced in the original formation of six couples, for which it was intended, it will be found much more lively and enjoyable.—*Editor*.

"*Dos à dos*" (or "*Allemande*"). *This figure is often omitted.*

(Meas. 1-4.) The head woman and foot man advance, pass each other right shoulder to right shoulder, go around each other back to back, and retire backward to their places.

(Meas. 5-8.) The head man and foot woman do the same.

"Right Hand to Partner and Reel"

(Meas. 1-16, repeated as necessary.)

(1) The first couple (head woman and head man) join right hands and swing once and a half around.

(2) The head woman swings the second man once around, with the left hand (while the head man does the same with the second woman).

(3) The head woman and head man swing each other once around with right hands.

(4) The head woman now swings the third man once around with the left hand (while the head man does the same with the third woman).

(5) The head woman and man swing each other once around with right hands, as before.

The head couple continue the "Reel" in this manner, swinging each couple in turn, until they reach the foot of the set, where they swing each other half around with right hands, so that the woman finishes on the women's side and the man on the men's side.

"Up the Centre"

The head couple face each other, join both hands, and with 8 galop steps dance up to the head of the set, where they release hands.

"March"

(Meas. 1-16, repeated as necessary.) The head couple separate and "cast off," the woman marching down the outside of the women's line, followed by all the other women in single file, and the head man, at the same time, marching down the outside of the men's line, followed by all the other men. (Diagram 2.)

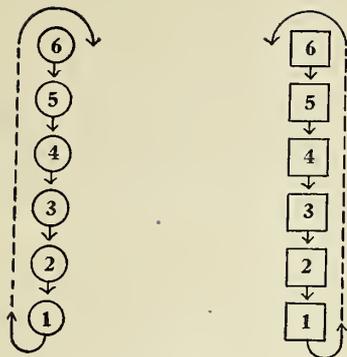

Diagram 2

When the head woman and man meet at the foot, they join hands and march up to the head of the set, followed by all the other couples.

“Down the Centre”

When all reach their original places, partners (with the exception of the head couple) join both hands and raise them high, forming a column of arches, under which the head couple (with both hands joined) dance down to the foot of the set with 8 galop steps.

The “Head Couple” remain at the foot of the set, and now become the “Foot Couple,” while the original second couple now become the “Head Couple.” (Diagram 3.)

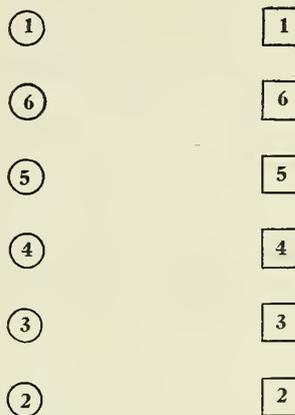

Diagram 3

The whole dance is repeated as described, until all reach their original positions in the set, when they finish with “Forward and Swing Partners,” and “Promenade around the Hall.”

THE DEVIL'S DREAM

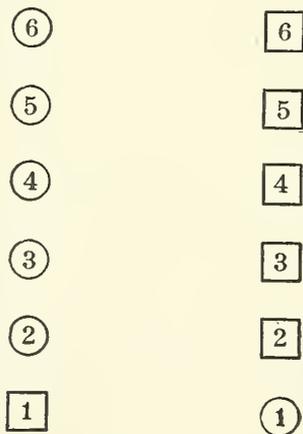

Diagram 1

The Dance.

“Head Couple down the Outside, Foot Couple up the Centre”

(Meas. 1-4.) The first woman and first man turn outward and go eight steps down the outside of the lines toward the foot of the set; at the same time the foot (sixth) couple join crossed hands and come eight steps up the centre toward the head.

(Meas. 5-8.) The first woman and first man return up the outside of the lines to places; and at the same time the foot couple face about without releasing hands, and return down the centre to their places at the foot.

**“Head Couple down the Centre,
Foot Couple up the Outside”**

(Meas. 9-12.) The first couple join crossed hands and go eight steps down the centre toward the foot; at the same time the foot woman and man each turn outward and go eight steps up the outside of the lines toward the head.

(Meas. 13-16.) The first couple face about, without releasing hands, and return up the centre to the head, where they separate, “cast off” and fall into places below the second couple (Diagram 2). At the same time the foot woman and foot man return down the outside of their lines to their places at the foot of the set.

“Ladies’ Chain”

(Meas. 1-8.) The first woman and second man execute “Ladies’ Chain” with the second women and first man.

“Right and Left”

(Meas. 9-16.) The first woman and second man execute “Right and Left” with the first man and second woman, and finish with the first

couple below the second couple (Diagram 2.)

The first couple now repeat the dance, this time with the third couple (while the second couple exchange places and stand idle at the head of the set), and continue in this manner, progressing down the set one place lower each time.

All couples except the first couple are “neutral” at the beginning of the dance.

When a “neutral” couple reach the head the set, the man and woman exchange places, stand idle during one repetition of the dance, then become “active,” and dance as described for the first couple.

When an “active” couple reach the foot of the set, they become the Foot Couple, dance as described for the Foot (sixth) Couple, then exchange places and become “neutral.”

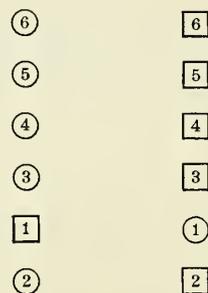

Diagram 2

When all six couples get back to their original positions, the dance is finished with “Forward and Swing Partners,” and “Promenade around the Hall.”

CHASE THE SQUIRREL

("Miss Mountan's Hornpipe")

Allegro moderato (♩ = 112)

The musical score is written for piano in 2/4 time. It consists of 16 measures, divided into three systems of five measures each. The first system (measures 1-5) starts with a mezzo-forte (mf) dynamic. The second system (measures 6-10) includes a forte (f) dynamic in measure 8 and a mezzo-forte (mf) dynamic in measure 9. The third system (measures 11-16) includes a crescendo (cresc.) in measure 14 and a forte (f) dynamic in measure 16. The bass line is primarily accompanimental, often using chords and a steady eighth-note pattern.

CHASE THE SQUIRREL

Formation: Longways for *six couples*, women in one line, and men in the other.

Steps: The usual country-dance step.

The Dance.

"Down the Outside and up the Centre"

(Meas. 1-4.) The first woman turns outward and goes down the outside of the women's line to the foot of the set, and at the same time the first man crosses over and "chases" her down the outside.

(Meas. 5-8.) The first woman (still followed by her partner) comes up the centre to the head of her line.

(Meas. 9-16.) The first man turns out and goes down the outside of the men's line to the foot, and up the centre to the head, followed by his partner, and finishing with both in original positions.

"Down the Centre and Back"

(Meas. 1-4.) First couple join crossed hands and go down the centre 8 steps.

(Meas. 5-8.) Without releasing hands, face about, return up the centre, release hands, separate, and "cast off," falling into the place next below the second couple.

“Right and Left”

(Meas. 9-16.) The first and second women execute “Right and Left” with the first and second men, and finish with first couple next below the second couple.

The first couple now repeat the whole dance with the new couple below them, and continue in the same manner, progressing down the set one place lower each time.

The two other odd couples (third and fifth), are also “active,” and dance “Down the centre and back” and “Right and Left,” at the same time and in the same manner as described for the first couple, but stand idle during the chasing figure.

The even couples (second, fourth and sixth), are “neutral,” and move up one place higher in the set each time. When a “neutral” couple reach the head, they stand idle during one repetition of the dance; then they become “active,” and dance as described for the first couple.

When an “active” couple reach the foot of the set, they become “neutral.”

NOTE: In the chasing figure it is possible for all the “active” couples to take part as follows: When the first woman goes down the outside with her partner following her, the third woman waits until the first man has passed behind her, when she falls in behind him with her partner following her; while the fifth woman waits and falls in behind the third man when he has passed her. In this way the “active” couples follow each other in numerical order down the outside (see Diagram 1)

and up the centre to their own places (see Diagram 2).

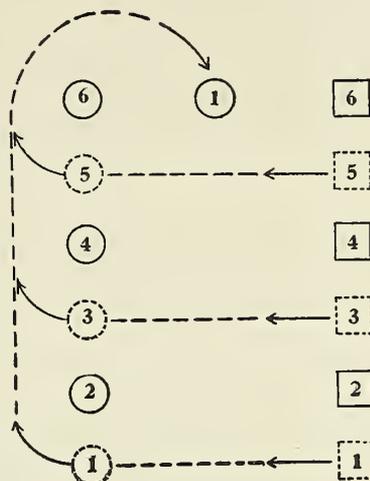

Diagram 1

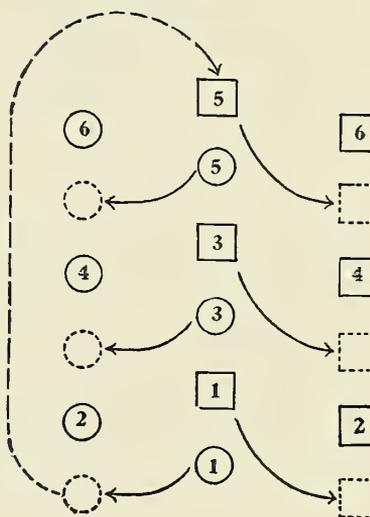

Diagram 2

When the dance has been repeated until all have reached their original positions, finish with “Forward and Swing Partners” and “Promenade around the Hall.”

(Meas. 9-12.) The first couple join crossed hands and go eight steps down the centre toward the foot, with the woman on the left of her partner.

(Meas. 13-16.) Without releasing hands they face up the set, with the woman now on the

The first couple now go down the outside from this new position, and repeat the whole dance, executing the "Ladies' Chain" this time with the couple which is now next below them. They continue in this manner, progressing down the set one place lower each time.

The other odd couples (third and fifth) are also "active," and dance at the same time and in the same manner as described for the first couple.

When a "neutral" couple reach the head of the set, they stand idle during one repetition of the dance, then become "active" and dance as described for the first couple.

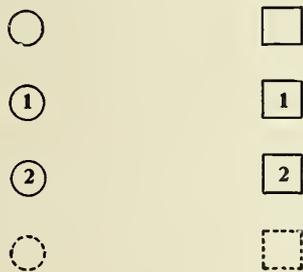

Diagram 1

The Dance.

“Balance and Swing Partner”

(Meas. 1-8.) First couple swing with sixteen buzz steps.

(Meas. 9.) Still keeping his right arm around her waist, the man releases his partner's right hand (which he has been holding with his left), and they open out, so as to be side by side, both facing in the same direction. In this position they “balance” away from each other (that is, the woman steps sideward to the right, with the right foot, and then closes her left foot to the right foot. The man at the same time balances to the left in the same manner).

(Meas. 10-16.) Resuming ordinary position they continue swinging as before.

“Down the Centre and Back”

(Meas. 1-4.) Still in ordinary position, the man leads his partner eight steps down the centre toward the foot of the set.

(Meas. 5-8.) They swing half around and return up the centre to the head, where they “cast off,” and fall into their respective lines in the place next below the second couple.

“Right and Left”

(Meas. 9-16.) The first and second women execute “Right and Left” with the first and second men, finishing in their new positions (the first couple next below the second couple).

The dance is continued in this manner, with the “active” couple progressing down the set, one place lower each time, and dancing with each “neutral” couple in turn. When a “neutral” couple reach the head of the set, they stand idle during one repetition of the dance, then become “active” and dance as described for the first couple. When an “active” couple reach the foot they become “neutral.”

Finish with “Forward and Swing Partners,” and “Promenade around the Hall.”

They continue progressing down the set, one place lower each time. When a “neutral” couple reach the head, they stand idle during one repetition of the dance, and then become “active,” and dance as described for the first couple. When an “active” couple reach the foot, they become “neutral.”
